PRODUCT	MacBook Air 2020	
DATE	11 July, 2025	
GOOD	**BAD**	**CAN BE ADDED**
High resolution display with true tones	Downloading certain apps is more complex than it needs to be	More ports besides C type
Clear stereo speakers (surprisingly good for the size)	245.11 GB data out of which 148 GB is system data	Receive files from Android or Windows devices via Wi-Fi Direct
720P HD webcam	Limited Android support	Swappable SSD/RAM
Thin and sleek scissor switch keys, quiet too	Only has a C Type port, lack of USB-A or HDMI	Touchscreen support
Large touchpad size	RAM is not upgradable, soldered SSD	Built-in Android emulator like iOS Simulator (no setup)
Multi-finger support on touchpad	Poor for testing GPU-heavy apps or mobile games	Foldable body or screen
Very small and lighweight, like a notebook	Managing folders in Finder is more tedious than it is in Windows Explorer	Delete button
Durable aluminium body	Apple repairs are extremely costly	Direct plug-and-play file transfer support like Windows
Apple Intelligence	MacOS security makes it harder to fully uninstall apps, with leftover files often needing manual removal	App unistaller (removes leftover system files too)
AI support in apps		
Interface is more aesthetic looking than Linux or Windows		
MI chip which works 10x faster than an i7 PC		
15+ hours of battery life in one charge		
Touch ID		
Spotlight feature		
Activity Monitor for diagnostics		
VoiceOver feature		
Look Up Feature		
Text To Speech (Mac OS)		
XCode and Docker are native IDEs		
Copy/paste code between Mac and iPhone/iPad		
iCloud Sync		
Built-in screenshot and screen recording tools (Shift + Cmd + 5)		

Module Name:	Login Page - Functional & UI Test Cases
Test Case ID:	st_01
Tester Name:	Priyanshi
Test Case Description:	To validate the functionality of user registration and login workflows on Instagram's desktop login page, and UI/UX responsiveness.
Prerequisites:	1. Stable internet connection 2. Browsers for cross browser testing 3. Valid URL for the login and singup page 4. Test user credentials
Environment Information:	OS: macOS (Sequoia15.5)System: Laptop (M

Scenario ID	Scenario	Test Steps	Test Input	Expected Results	Actual Results	Status	Comments
1a	Sign up with valid credentials	1. Click on Sign Up 2. Enter Email 3. Enter Full Name 4. Enter Username 5. Enter Password 6. Click on Sign Up	Valid Email, Full Name, Username, Password	Successfully signed up	Successfully signed up	Pass	Covers positive flow with valid credentials
1b	Sign up using already registered email	1. Click on Sign Up 2. Enter existing Email 3. Fill all fields 4. Click on Sign Up	Email already linked to existing account, new username, same password	Should show error that email is already in use	Account was created successfully	Fail	Instagram allowed duplicate email account creation; needs deeper validation check
1c	Sign up with invalid username	1. Click on Sign Up 2. Enter Username with special characters or spaces 3. Fill other fields 4. Click on Sign Up	Invalid username	Error shown or input blocked	Error displayed	Pass	Username format validation
1d	Sign up with only whitespace inputs	1. Click on Sign Up 2. Enter space characters in required fields 3. Click on Sign Up	Whitespace input	Treated as empty fields → show error	Error displayed	Pass	Whitespace-only input was correctly rejected; validation working as expected.
1e	Sign up with weak password	1. Click on Sign Up 2. Enter valid Email, Name, and Username 3. Enter weak Password 4. Click on Sign Up	Weak password like 12345	Error message shown for weak password	Error displayed	Pass	Validates password strength check
1f	Check password visibility toggle	1. Click on Sign Up 2. Enter Password 3. Click on eye icon beside password field	-	Password becomes visible	Password visibility toggles correctly	Pass	Usability check for password input
1g	Check responsive layout of sign up form	1. Open Sign Up page 2. Resize browser window or open on mobile	-	Form adapts to screen size	Form remains responsive and usable	Pass	UI responsiveness test
1h	Sign up with international phone number	1. Click on Sign Up 2. Enter phone number with country code 3. Fill other fields 4. Click on Sign Up	Phone number like +49xxxxxxxxxx	Accepted or properly validated	Accepted per rules	Pass	Tests international number support
2a	Login with valid credentials	1. Click on Log In 2. Enter valid Username and Password 3. Click Log In	Correct username and password	User logs in and lands on homepage	Login successful	Pass	Main login flow
2b	Login with wrong password	1. Click on Log In 2. Enter valid username and wrong password 3. Click Log In	Wrong password	Error message shown like "Wrong password"	Error shown	Pass	Password validation
2c	Try login with empty fields	1. Click on Log In 2. Leave username and/or password blank 3. Click Log In	Blank input	Login button remains disabled	Login button not pressable	Pass	Error not shown, but login prevented via button
2d	Login with case changes in email, username, or password	1. Click on Log In 2. Enter email/username/password with altered letter casing 3. Click Log In	Email with changed case (e.g., USER@xyz.com) Username with changed case (e.g., TestUser → TESTUSER) Password with changed case	- Email: login works normally (not case-sensitive) - Username: shows password error if case changed - Password: shows error if case changed	Behaved as expected	Pass	Emails are not case-sensitive; usernames are, so changing case points to someone else's account; passwords are always case-sensitive
2e	Forgot password flow	1. Click on Log In 2. Click on "Forgot Password?" 3. Enter email/username 4. Follow reset steps	Valid registered email	Reset link sent or next steps shown	Reset process starts	Pass	Forgot password working
2f	Check login field visibility on mobile	Open login page on mobile device	-	Fields should be clearly visible and usable	Looks good on mobile	Pass	UI responsive on small screens
2g	Login using "Log in with Facebook"	1. Click on 'Log in with Facebook' or 'Log in with Google' 2. Select or enter account details if prompted 3. Grant permissions if needed	Valid third-party account	Logged in successfully using selected platform	User logged in via social login	Pass	Login with Facebook was successful; redirected to homepage without issues.
2h	Login rate limit test	1.Enter a valid username 2. Enter a wrong password 3. Click on Log In 4. Repeat steps 3–4 20+ times	Valid username + wrong password (repeated multiple times)	Rate limit triggered or CAPTCHA shown after multiple failed attempts	Each time it just shows "Wrong password" - even after 20+ attempts, with no warning or restriction	Fail	No rate limiting or CAPTCHA implemented, poses a risk for brute-force attacks. Needs backend support for login attempt monitoring.
3a	Logout from Dashboard	1. Login to app 2. Click on Profile Icon 3. Click on Logout	Logged-in session	User is logged out and redirected to Login page	User is logged out and redirected to Login page	Pass	Covers standard logout flow
3b	Logout via Back Button	1. Login to app 2. Click Logout 3. Press browser back button	Logged-in session	User stays logged out and does not return to dashboard	User stays logged out and does not return to dashboard	Pass	Validates session clearing
4a	Check Button Alignments	1. Go to Login Page 2. Observe button placements	None	All buttons are aligned properly	All buttons are aligned properly	Pass	Covers UI layout check
4b	Check Color Contrast in Dark Mode	1. Enable Dark Mode 2. Navigate through all screens	None	Text and buttons are clearly visible with good contrast	Text and buttons are clearly visible with good contrast	Pass	Covers accessibility in dark mode
4c	Check Input Field Spacing	1. Open Register Page 2. Observe spacing between Email and Password fields	None	Sufficient spacing for clarity and comfort	Sufficient spacing for clarity and comfort	Pass	Fixes crowded appearance issue
4d	Visual Feedback on Click	1. Hover and click on buttons and inputs	None	Buttons highlight or animate on click	Buttons highlight or animate on click	Pass	Checks interactive feedback
